PRODUCT:	PHEROBOAR 100ML
REVISION (yymmdd):	250729
REFERENCE:	BLT004052

GENERAL CHARACTERISTICS:

DESCRIPTION	Boar odour. Synthetic pheromones for heat detection in sows and gilts
PRESENTATION	Box (3 x 100mL): 105 x 175 x 75 mm / 0.4kg Box (9 boxes, 27 x 100mL): 325 x 235 x 185 mm / 3.5kg
Set of synthetic pheromones with spray to determine the heat in nulliparous and multiparous sows. Stimulation of oestrus and sexual response in sows. Special help tool in heat synchronization in nulliparous. Improves fertility by reducing non-productive days and helps detect heat in troubled times (heat) and in areas where the male is not used (quarantine maternity). Reduces reflux due to increased simulation of the sows. It incorporates blue dye to mark the treated animals. The sprayer allows to administer the exact dose without wasting the product.	

SPECIFICATIONS:

COMPOSITION	
5α-androst-16-en-3-one	
Androstenol	
DPG	
SD-alcohol	
Water
